

Largest online asynchronous rock-paper-scissors tournament

Submit this packet through the Guinness World Records organisation account, together with RULES.md, EVIDENCE.md and WITNESS-PLAN.md. Do not start the official count until written guidelines arrive. The software auto-starts the official bracket only after 50,000 phone-verified signups.

1. Applicant

Organisation	SerendipEatery
Contact name	_____
Role	Record attempt organiser
Email	_____
Phone	_____
City / Country	United States
Postal address	_____

2. Proposed record

Proposed title	Largest online asynchronous rock-paper-scissors tournament
Related title	Largest RPS tournament — 10,033, Tianjin Joy City, 24 Dec 2019
Why a new title	Existing title is in-person. This attempt is one global async single-elim app tournament.
Who may attempt	An organisation
Location	Online / worldwide. Play in the official app. Live bracket on the web.
Entry fee / prize	None. Free to enter. No cash prize.

3. How it is measured

The record number is official participants in one single-elimination tournament: a unique person who registered a legal name, verified a unique mobile phone by OTP, attested the minimum age, consented to the roster and SMS, and either locked at least one throw or received a documented first-round bye after freeze. Duplicate phones, unverified phones, and no-shows who never threw are excluded from the submitted count.

4. Format and automation

Registration stays open until 50,000 phone-verified players. At that threshold the system automatically freezes registration, publishes a freeze seed and roster hash, generates one single-elimination bracket (byes if needed), and texts every live player. Each match is first to two winning throws. Both players lock a sealed sequence of three throws. Default deadline: 48 hours, with SMS at match-live, 24 hours, and 1 hour. Auto-forfeit if only one player locked. If neither locked, both are no-shows; one advances by documented coin-flip. Pure no-shows are not official participants.

While the 50,000 count is filling, any verified registrant may host invite-only friend tournaments (“winner decides what we do tonight”). Those social brackets use the same engine and are logged as dry-run evidence (social_bracket_test).

5. Dates (auto-triggered)

Registration opens	After written guidelines are received
Official freeze / Round 1	Automated: the moment verified signups exceed 50,000
Match deadline	48 hours from a match becoming live
Expected duration	Up to 16 rounds x 48 hours, about 32 days after freeze
Close	When the final completes; status becomes pending_verification

6. Evidence (automated)

- SHA-256 hash-chained event log for every registration, lock, result, and forfeit.
- Frozen roster CSV (legal name, verified phone, timestamps, IP, official flag).
- Full match log and SMS log. Automatic snapshots at freeze, generation, end of each round, and close.
- Public live counter and live bracket. Video: freeze, generation, continuous livestream, and the final.
- Two independent witnesses with read-only access.

7. Independent witnesses

Name two people who are not employees and have no financial interest in the result.

Witness 1 name	_____
Witness 1 email / role	_____
Witness 2 name	_____
Witness 2 email / role	_____
Livestream URL	_____

8. Questions for Records Management

Please issue guidelines on: (1) new title vs existing in-person title; (2) 48-hour deadlines and auto-forfeit; (3) whether a first-round bye counts; (4) no-show counting; (5) identity standard; (6) steward ratio for a digital event; (7) video for a multi-week async attempt; (8) whether pre-freeze social brackets may be cited as dry-run evidence.

9. Organiser declaration

I confirm this application is true, that SerendipEatery will follow the guidelines Guinness issues, that the official attempt will not begin until those guidelines arrive, and that the 50,000-player auto-start will be disabled if Guinness requires a different freeze rule.
